

Microbot Medical Announces New Webinar Series to Engage Stakeholders with Experts in the Healthcare Space

November 15, 2022

The “Access-Ability Live” by MBOT will build an online community of healthcare industry leaders who are interested in robotics to come together and share their opinion and experience

First Webinar on November 16th at 1:00 pm ET will Focus on the Evolving Endovascular Space Procedures and How Emerging New Technologies such as the LIBERTY® Robotic System may be used by Physicians in the Future

HINGHAM, Mass., Nov. 15, 2022 (GLOBE NEWSWIRE) -- Microbot Medical Inc. (Nasdaq: MBOT), announced that it will be hosting a monthly educational webinar series, the **Access-Ability Live by MBOT**, to focus on key issues impacting the future of the endovascular space, including robotics and other medical devices that will improve patient outcomes, and the place that the LIBERTY® Robotic System is expected to play in it. Each month, the Company plans to partner with industry leaders, such as physicians, hospital administrators, entrepreneurs, technicians and financial experts for a live discussion and Q&A session to address top-of-mind healthcare related topics.

The initial webinar will be held on November 16, 2022, at 1:00 pm ET, and hosted by the Company's Chief Medical Officer, Dr. Eyal Morag. Dr. Morag's guest speaker will be Dr. Sebastian Flacke, a global leader in the endovascular space and Chief of Interventional Radiology and Director of non-invasive Cardiovascular Imaging at Lahey Hospital & Medical Center. Dr. Flacke is expected to address the current landscape for endovascular procedures, and how it has changed over the past and the emerging technologies being developed today that can potentially and significantly change how these procedures are going to be performed in the near future. Dr. Flacke will also share his recent hands-on experience with the LIBERTY Robotic System and the future impact that he believes it will have on his practice once the system is cleared for commercialization in the U.S.

“Over the last couple of months, we have noticed increased interest in our LIBERTY® Robotic System technology by multiple stakeholders, ranging from physicians, investors, strategic partners, and others, which coincides with our continued efforts towards the regulatory and commercialization phases,” commented Harel Gadot, Chairman, CEO and President. “To address this growing interest and ensure we are engaging with our key stakeholders, it's critical they hear first-hand from industry experts about the growing unmet needs in the endovascular space, and how the LIBERTY Robotic System has the potential to resolve many of the challenges being experienced today. Our decision to launch the **Access-Ability Live by MBOT** webinar series is meant to establish an online community of industry leaders who are interested in robotics to come together and share their experience.”

To participate on the webinar, please register in advance at: https://us06web.zoom.us/webinar/register/WN_BslG0qO6QJem2Fw_gPSCuw. After registering, participants will receive a confirmation email containing information about joining the webinar.

About Microbot Medical

Microbot Medical Inc. (NASDAQ: MBOT) is a pre-clinical medical device company that specializes in transformational micro-robotic technologies, focused primarily on both natural and artificial lumens within the human body. Microbot's current proprietary technological platforms provide the foundation for the development of a Multi Generation Pipeline Portfolio (MGPP).

Microbot Medical was founded in 2010 by Harel Gadot, Prof. Moshe Shoham, and Yossi Bornstein with the goals of improving clinical outcomes for patients and increasing accessibility through the use of micro-robotic technologies. Further information about Microbot Medical is available at <http://www.microbotmedical.com>.
