

Microbot Medical's Novel LIBERTY® Robotic System Continues to be Validated with Latest U.S. Design Patent Allowance

November 18, 2022

Advanced Features of Remote Controller Specifically Developed to Deliver an Enhanced User Experience During Endovascular Procedures

HINGHAM, Mass., Nov. 18, 2022 (GLOBE NEWSWIRE) -- Microbot Medical Inc. (Nasdaq: MBOT), in a continuation of its efforts to create barriers and expand its global intellectual property portfolio for the LIBERTY® Robotic System, was issued a design patent allowance by the US Patent & Trademark Office (USPTO), covering the LIBERTY Robotic System's remote controller unique interface design.

"The remote controller for the LIBERTY Robotic System is unique and was developed with feedback based on the hands-on experience of key physicians over the course of its development," commented Simon Sharon, General Manager and Chief Technology Officer. "The evolution of the feedback generated during development, lab and pre-clinical settings has resulted in continued improvement over the years. We wanted to perfect the remote controller so as to replicate the hand motion during endovascular procedures, and to streamline the interaction with the guidewire, microcatheter and guiding catheter to shorten the time of endovascular procedures."

The Company will be showcasing and demonstrating the LIBERTY Robotic System on January 9-11, 2023, in San Francisco, CA, concurrent with a leading healthcare conference. Investors, analysts, physicians and industry professionals that want to get a hands-on experience using the LIBERTY Robotic System's remote controller can email mpolyviou@evcgroup.com and schedule a meeting.

About Microbot Medical

Microbot Medical Inc. (NASDAQ: MBOT) is a pre-clinical medical device company that specializes in transformational micro-robotic technologies, focused primarily on both natural and artificial lumens within the human body. Microbot's current proprietary technological platforms provide the foundation for the development of a Multi Generation Pipeline Portfolio (MGPP).

Microbot Medical was founded in 2010 by Harel Gadot, Prof. Moshe Shoham, and Yossi Bornstein with the goals of improving clinical outcomes for patients and increasing accessibility through the use of micro-robotic technologies. Further information about Microbot Medical is available at <http://www.microbotmedical.com>.
