

Microbot Medical Welcomes Distinguished Interventional Cardiologist and Early Adopter of Endovascular Robotics to its Next “Access-Ability Live by MBOT” Webinar Series

January 31, 2023

Dr. Giora Weisz, a Practicing Interventional Cardiologist and Clinical Researcher who was One of the Early Users of Robotic-Enhanced Coronary Interventions, as well as Navigation and Positioning Technologies, Will be the Guest Speaker.

The Webinar is Intended for All Stakeholders Interested in the Future of Endovascular Robotics, and Will be Held on Wednesday, February 8, 2023, at 1:00pm ET

HINGHAM, Mass., Jan. 31, 2023 (GLOBE NEWSWIRE) -- Microbot Medical Inc. (Nasdaq: MBOT), the developer of the LIBERTY® Robotic System, the first single-use endovascular robotic system, announced the next episode of its highly successful “Access-Ability Live by MBOT” webinar, which is intended for all stakeholders interested in the endovascular robotic space and will be held on Wednesday, February 8, 2023, at 1:00pm ET. It will be hosted by the Company’s Chief Medical Officer, Dr. Eyal Morag.

Dr. Morag’s guest speaker will be Dr. Giora Weisz, an interventional cardiologist and Associate Professor of Medicine at Columbia University Medical Center, Director of Interventional Cardiology at the New York-Presbyterian Hudson Valley Hospital, and a member of the faculty of the Center of Interventional Vascular Therapy at Columbia University Medical Center. He is also a faculty member at the Cardiovascular Research Foundation in New York. Dr. Weisz, who has a particular interest in current and innovative technologies in cardiovascular medicine, is an early adopter of robotic-enhanced coronary interventions, as well as navigation and positioning technologies. Dr. Weisz, who performed Corindus Vascular Robotics’ (acquired by Siemens Healthineers) First-in-Human (FIH) clinical trial to evaluate the safety and technical efficacy of Corindus’ CorePath system in delivering and manipulating coronary guidewires and stent/balloon systems in PCI procedures and was the first to use this system on patients in the U.S., will share his personal experiences using a number of different endovascular robotic systems while addressing the current and future landscapes for endovascular procedures and the critical role of surgical robotics to address future medical needs.

The “**Access-Ability Live by MBOT**” webinar series focuses on key topics in the healthcare and endovascular space. Each month, the Company will be partnering with industry leaders, such as physicians, hospital administrators, entrepreneurs, technicians and financial experts for a live discussion and Q&A session to address top-of-mind topics related to endovascular procedures.

About Microbot Medical

Microbot Medical Inc. (NASDAQ: MBOT) is a pre-clinical medical device company that specializes in transformational micro-robotic technologies, focused primarily on both natural and artificial lumens within the human body. Microbot’s current proprietary technological platforms provide the foundation for the development of a Multi Generation Pipeline Portfolio (MGPP).

Microbot Medical was founded in 2010 by Harel Gadot, Prof. Moshe Shoham, and Yossi Bornstein with the goals of improving clinical outcomes for patients and increasing accessibility through the use of micro-robotic technologies. Further information about Microbot Medical is available at <http://www.microbotmedical.com>.
