

Microbot Medical Announces \$1.5 Million Registered Direct Offering Priced At-The-Market under Nasdaq Rules

June 2, 2023

HINGHAM, Mass., June 02, 2023 (GLOBE NEWSWIRE) -- Microbot Medical Inc. (Nasdaq: MBOT) today announced that it has entered into definitive agreements for the purchase and sale of 701,756 shares of the Company's common stock at a purchase price of \$2.1375 per share of common stock in a registered direct offering priced at-the-market under Nasdaq rules. In addition, in a concurrent private placement, the Company will issue unregistered series C preferred investment options. The series C preferred investment options to purchase up to 350,878 shares of common stock have an exercise price of \$2.075 per share and are immediately exercisable for a period of five and one-half years following issuance. The closing of the registered direct offering and the concurrent private placement is expected to occur on or about June 6, 2023, subject to the satisfaction of customary closing conditions.

H.C. Wainwright & Co. is acting as the exclusive placement agent for the offerings.

The gross proceeds to the Company from the offerings are expected to be \$1.5 million, before deducting the placement agent's fees and other offering expenses payable by the Company. The Company intends to use the net proceeds from the offerings for the continued development, commercialization and regulatory activities for the Company's LIBERTY[®] Robotic System, expansion and development of additional applications derived from the Company's existing IP portfolio, and for working capital and other general corporate purposes.

The shares of common stock described above (but not the series C preferred investment options issued in the concurrent private placement or the shares of common stock underlying such series C preferred investment options) are being offered by the Company pursuant to a "shelf" registration statement on Form S-3 (File No. 333-250966) previously filed with the Securities and Exchange Commission (the "SEC") and declared effective by the SEC on December 4, 2020. The offering of the shares of common stock is made only by means of a prospectus, including a prospectus supplement, forming a part of the effective registration statement. A final prospectus supplement and accompanying prospectus relating to the registered direct offering will be filed with the SEC. Electronic copies of the final prospectus supplement and accompanying prospectus may be obtained, when available, on the SEC's website at <http://www.sec.gov> or by contacting H.C. Wainwright & Co., LLC at 430 Park Avenue, 3rd Floor, New York, NY 10022, by phone at (212) 865-5711 or e-mail at placements@hcwco.com.

The series C preferred investment options described above are being issued in a concurrent private placement under Section 4(a)(2) of the Securities Act of 1933, as amended (the "Securities Act"), and Regulation D promulgated thereunder and, along with the shares of common stock underlying the series C preferred investment options, have not been registered under the Securities Act, or applicable state securities laws. Accordingly, the series C preferred investment options and underlying shares of common stock may not be offered or sold in the United States except pursuant to an effective registration statement or an applicable exemption from the registration requirements of the Securities Act and such applicable state securities laws.

This press release shall not constitute an offer to sell or a solicitation of an offer to buy these securities, nor shall there be any sale of these securities in any state or other jurisdiction in which such offer, solicitation or sale would be unlawful prior to the registration or qualification under the securities laws of any such state or other jurisdiction.

About Microbot Medical

Microbot Medical Inc. (NASDAQ: MBOT) is a pre-clinical medical device company that specializes in transformational micro-robotic technologies, with the goals of improving clinical outcomes for patients and increasing accessibility through the natural and artificial lumens within the human body.

The LIBERTY Robotic System aims to improve the way surgical robotics are being used in endovascular procedures today, by eliminating the need for large, cumbersome, and expensive capital equipment, while reducing radiation exposure and physician strain. The Company believes the LIBERTY Robotic System's remote operation has the potential to be the first system to democratize endovascular interventional procedures.
