

## **Microbot Medical Gains Global Recognition; Professor Vincent Vidal to Present an Abstract on The LIBERTY® Robotic Surgical System at CIRSE 2023**

September 8, 2023

### **The presentation follows successful extensive uses of the Company's endovascular robotic system in pre-clinical studies**

BRAINTREE, Mass., Sept. 08, 2023 (GLOBE NEWSWIRE) -- Microbot Medical Inc. (Nasdaq: MBOT) is honored to announce the continuous growing global recognition of its LIBERTY® Robotic Surgical System, to be presented in an abstract at the Annual Congress of the Cardiovascular and Interventional Radiological Society of Europe (CIRSE) on September 9, 2023. The abstract is to be presented by Professor of Interventional Radiology Vincent Vidal, M.D. PhD, from the Aix-Marseille University and a Scientific Advisory Board Member of Microbot.

The abstract and oral presentation, titled "Performance Evaluation of a Miniature and Disposable Endovascular Robotic Device" was accepted following a successful pre-clinical trial with a team of leading European interventional radiologists. The team expressed their positive experiences and satisfaction from using the Company's Robotic Surgery System.

The Company believes that the accumulation of peer-reviewed data during the pre-clinical studies are invaluable opportunities to gather leading physicians' and future users' insight as it finalizes the necessary steps prior to its expected First in Human (FIH) clinical trial and the regulatory process with the FDA in the USA and MDR in Europe.

#### **About Microbot Medical**

Microbot Medical Inc. (NASDAQ: MBOT) is a pre-clinical medical device company that specializes in transformational micro-robotic technologies, with the goals of improving clinical outcomes for patients and increasing accessibility through the natural and artificial lumens within the human body.

The LIBERTY® Robotic Surgical System aims to improve the way surgical robotics are being used in endovascular procedures today, by eliminating the need for large, cumbersome, and expensive capital equipment, while reducing radiation exposure and physician strain. The Company believes the LIBERTY® Robotic Surgical System's remote operation has the potential to be the first system to democratize endovascular interventional procedures.
