

Microbot Medical Submits an IDE Application to Gain FDA Approval to Commence Its Pivotal Clinical Trial in the US

February 5, 2024

The Investigational Device Exemption (IDE) application follows the completion of multiple activities necessary to file this application

BRAINTREE, Mass., Feb. 05, 2024 (GLOBE NEWSWIRE) -- Microbot Medical Inc. (Nasdaq: MBOT), developer of the LIBERTY[®] Endovascular Robotic Surgical System, announced that it has filed an Investigational Device Exemption (IDE) application with the US Food and Drug Administration (FDA). The IDE application follows the completion of multiple preclinical activities performed to provide preliminary safety and effectiveness information, and its approval by the FDA would allow the company to commence its pivotal human clinical trial in the United States.

"This is an important milestone for the company, and it is another step forward in our journey to achieve FDA clearance for the LIBERTY® Endovascular Robotic Surgical System," said Harel Gadot, CEO, President and Chairman of Microbot Medical.

About Microbot Medical

Microbot Medical Inc. (NASDAQ: MBOT) is a pre-clinical medical device company that specializes in transformational micro-robotic technologies, with the goals of improving clinical outcomes for patients and increasing accessibility through the natural and artificial lumens within the human body.

The LIBERTY Endovascular Robotic Surgical System aims to improve the way surgical robotics are being used in endovascular procedures today, by eliminating the need for large, cumbersome, and expensive capital equipment, while reducing radiation exposure and physician strain. The Company believes the LIBERTY Endovascular Robotic Surgical System's remote operation has the potential to be the first system to democratize endovascular interventional procedures.
