

## Microbot Medical® Announces Late-Breaking Abstract Acceptance at the Society of Interventional Radiology Annual Meeting

February 4, 2025

**Acceptance reflects the high interest of the SIR scientific committee on the emerging role of endovascular robotics**

BRAINTREE, Mass., Feb. 04, 2025 (GLOBE NEWSWIRE) -- Microbot Medical Inc. (Nasdaq: MBOT), developer of the innovative LIBERTY® Endovascular Robotic System, today announced the acceptance of a late-breaking abstract that will be presented at the upcoming Society of Interventional Radiology (SIR) annual meeting, being held in Nashville, TN on March 29 - April 2, 2025. The data from the Company's ACCESS-PVI trial, a prospective, multicenter, single-arm trial evaluating the performance and safety of LIBERTY® in patients undergoing peripheral vascular interventions, will be presented for the first time at a podium presentation.

- **Abstract/Presentation Title:** Remote-controlled endovascular navigation with a miniature, single-use, robotic system. Results of the ACCESS-PVI trial
- **Presenter:** Francois Cornelis, MD, PhD, FCIIRSE, Memorial Sloan Kettering Cancer Center, Department of Radiology.
- **Location:** Music City Center, Nashville, TN
- **Date/Time:** Wednesday, April 2, 11:33 AM - 11:42 AM CT

"We believe the acceptance of this late breaking news is critically important and allows the Principal Investigators (PI) to present the data for the first time at the SIR annual meeting, especially since the primary attendees at this conference are potential users of LIBERTY®," commented Harel Gadot, Chairman, CEO and President. "In addition, we believe that the potential benefits of LIBERTY® will be meaningful and significant to the audience."

### About Microbot Medical®

Microbot Medical Inc. (NASDAQ: MBOT) is a pre-commercial stage medical technology company with a vision to improve the quality of care for millions of patients and providers globally. The Company has developed the world's first single-use, fully disposable endovascular robotic system, which aims to eliminate traditional barriers to accessing advanced robotic systems.
