

Microbot Medical Schedules Virtual Meeting to Address Increased Interest Following its Recent Announcement

August 20, 2020

Webinar to be Held on Wednesday August 26th at 11am ET

HINGHAM, Mass., Aug. 20, 2020 (GLOBE NEWSWIRE) -- Following its participation at the Needham Virtual Med Tech & Diagnostic conference, as well as the overwhelming interest generated since its recent announcement which included the outcome of a feasibility animal study with respect to the LIBERTY™ Robotic System, Microbot Medical Inc. (Nasdaq: MBOT) will host a webinar on Wednesday, August 26, 2020 at 11:00am ET. Harel Gadot, the Company's CEO, President and Chairman, will share the Company's view on the surgical robotic market, the results of the feasibility animal study, as well as other recent achievements. Additionally, members of the Company's management team, including Dr. Eyal Morag, Chief Medical Officer, Simon Sharon, Chief Technology Officer and Eran Cohen, Senior Director of Business Development, will be available for a question and answer session.

To participate on the webinar, please register in advance at: https://zoom.us/webinar/register/WN_5JfsfM-aR4WVKdJncgGbv. After registering, participants will receive a confirmation email containing information about joining the webinar.

The LIBERTY™ Robotic System, which the Company believes to be the first fully disposable surgical robotic system, has met all of its end points with no intraoperative adverse events. This supports the Company's vision of democratizing endoluminal procedures while enhancing clinical and economical outcomes. The LIBERTY™ Robotic System has the potential to allow physicians to conduct catheter-based procedure from outside the catheterization laboratory (cath-lab), avoiding radiation exposure, physical strain and the risk of cross contamination. The study was performed by two leading physicians in the neuro vascular and peripheral vascular intervention spaces, and the results demonstrated robust navigation capabilities, intuitive usability and accurate deployment of embolic agents, most of which was conducted remotely from the cath-lab's control room.

About Microbot Medical

Microbot Medical Inc. (NASDAQ: MBOT) is a pre-clinical medical device company that specializes in transformational micro-robotic technologies, focused primarily on both natural and artificial lumens within the human body. Microbot's current proprietary technological platforms provide the foundation for the development of a Multi Generation Pipeline Portfolio (MGPP).

Microbot Medical was founded in 2010 by Harel Gadot, Prof. Moshe Shoham, and Yossi Bornstein with the goals of improving clinical outcomes for patients and increasing accessibility through the use of micro-robotic technologies. Further information about Microbot Medical is available at <http://www.microbotmedical.com>.
