Overview

We are a medical device company specializing in the research, design and development of next generation robotic endoluminal surgery devices targeting the minimally invasive surgery space. We are primarily focused on leveraging our robotic technologies with the goal of redefining surgical robotics while improving surgical outcomes for patients.

Using our LIBERTY[®] technological platform, we have developed the first-ever fully disposable robot for various endovascular interventional procedures. The LIBERTY[®] Endovascular Robotic Surgical System is designed to maneuver guidewires and over-the-wire devices (such as microcatheters) within the body’s vasculature. It is intended for the remote delivery and manipulation of guidewires and catheters, and remote manipulation of guide catheters to facilitate navigation to anatomical targets, with the current intention to focus in the peripheral vasculature market. It is designed to eliminate the need for extensive capital equipment requiring dedicated Cath-lab rooms as well as dedicated staff.

Recent Developments

Granted U.S. Food and Drug Administration 510(k) Clearance

On September 8, 2025, we announced that the U.S. Food and Drug Administration (“FDA”) has granted 510(k) clearance for the LIBERTY[®] Endovascular Robotic System, the first FDA cleared single-use, remotely operated robotic system for peripheral endovascular procedures. The FDA clearance positions us to commercialize LIBERTY[®] in the U.S., with the goal of transforming the field to enable accessibility to advanced robotics without the traditional constraints of capital equipment and a dedicated infrastructure. With FDA clearance, we expect to complete the final commercial activities that were contingent on marketing clearance, positioning us to commence commercialization, penetrate the approximately 2.5 million annual U.S. peripheral vascular procedures, and pursue entry into global markets.

We partnered with a U.S. based third-party logistics (3PL) company to support the commercialization of the LIBERTY[®] Endovascular Robotic System. On November 5, 2025, we announced that we initiated the limited market release of the LIBERTY[®] System to selected high procedure volume regions where we already experienced preliminary demand for the product, with the broader launch anticipated to occur in April 2026 during the Society of Interventional Radiology conference.

Granted First Japanese Patent

On October 1, 2025, we announced that the Japanese Patent Office has granted the Company its first patent in Japan, covering the core LIBERTY[®] System technology, such as a compact robotic device for driving and manipulating movement of at least one elongate surgical tool.

Granted U.S. Patent for a Modular Robotic Surgical System

On August 20, 2025, we announced that the United States Patent and Trademark Office has granted us a patent, covering a modular robotic surgical system which includes a base and a plurality of tool-receiver unites arranged as separate unites and independently and interchangeably attachable to the base.

Granted Patent in China for the Robotic Manipulation of a Surgical Tool Handle

On June 17, 2025, we announced that the China National Intellectual Property Administration has granted us a critical patent in China, a key step in our global intellectual property expansion strategy. The patent covers the robotic manipulation of a surgical tool handle.

Israel-Hamas War

On October 7, 2023, the State of Israel, where our research and development and other operations are primarily based, suffered a surprise attack by hostile forces from Gaza, which led to Israeli military operation at first in Gaza and then in Lebanon. These military operations and related activities, such as the collapse of the Assad regime in Syria and Israel's subsequent military operations in Syria, and the escalation of military operations by and against the Houthis in Yemen and the Iranian regime, are on-going as of the date of this prospectus, although there have been temporary cease fires and lulls in military operations from time to time, including the most recent cease-fire with Hamas on October 10, 2025.

We have considered various ongoing risks relating to the military operations and related matters, including:

- That some of our Israeli subcontractors, vendors, suppliers and other companies in which the Company relies, may not be fully active and operational, as instructed by the relevant authorities;
- A slowdown in the number of international flights in and out of Israel;
- The decreasing international regard for Israeli-based companies in certain quarters, including as a result of the Israeli government's policies in Gaza and the West Bank; and
- Possible and actual boycotts of Israel and Israeli-based companies, which may adversely affect our ability to do business in certain jurisdictions or with certain industry groups or potential customers, among others.

We are closely monitoring how the military operations and related activities could adversely affect our anticipated milestones and our Israel-based activities to support future clinical and regulatory milestones, including our ability to import materials that are required to construct our devices and to ship them outside of Israel. In addition, we are also monitoring how negative international reaction to the events in Gaza, the West Bank and elsewhere in the Middle East could create a corresponding negative perception of companies based in Israel, which if broad enough, could negatively impact our business. As of the date of this prospectus, we have determined that there have not been any materially adverse effects on our business or operations, but we continue to monitor the situation, as any collapse of a cease-fire with any nation or group hostile to Israel from time to time or any future escalation or change could result in a material adverse effect on the ability of our Israeli office to support our clinical and regulatory activities. We do not have any specific contingency plans in the event of any such escalation or change.

Technological Platforms

LIBERTY[®] Endovascular Robotic Surgical System

The FDA-cleared LIBERTY[®] Endovascular Robotic Surgical System features a unique compact, single-use design with the capability to be operated remotely, reduce radiation exposure and physical strain to the physician, as well as the potential to reduce the use of consumables.

The LIBERTY[®] Endovascular Robotic Surgical System is designed to maneuver guidewires and over-the-wire devices (such as microcatheters) within the body's vasculature. It eliminates the need for extensive capital equipment requiring dedicated Cath-lab rooms as well as dedicated staff, when compared to other robotic systems.

We believe the addressable markets for the LIBERTY[®] Endovascular Robotic Surgical System in its current version includes the peripheral interventional radiology market, with future versions expected to include the Interventional Cardiology and Interventional Neuroradiology markets.

The unique characteristics of the LIBERTY[®] Endovascular Robotic Surgical System – compact, mobile, disposable and remotely controlled – also may open the opportunity of expanding telerobotic interventions to patients with limited access to life-saving procedures.

The LIBERTY[®] Endovascular Robotic Surgical System has been designed to have the following attributes:

- Compact size - Eliminates the need for large capital equipment in dedicated cath-lab rooms with dedicated staff.
- Fully disposable - To our knowledge, the first fully disposable robotic system for endovascular procedures.
- One & Done[®] - Has the potential to be compatible with our NovaCross[®] products or possibly other instruments that combine guidewire and microcatheter into a single device. We are currently evaluating this combination in different applications.
- State of the art maneuverability - Provides linear and rotational control of its guidewire, as well as linear and rotational control of a guide catheter, and the linear motion for an additional microcatheter (“over-the-wire”) device.
- Compatibility with a wide range of commercially-available guidewires, microcatheters and guide-catheters.
- Enhanced operator safety and comfort - Aims to reduce exposure to ionizing radiation and reduce physical strain due to the need for heavy lead vests otherwise to be worn during procedures.
- Ease of use - A remote control designed to be intuitive aims to simplify advanced procedures while shortening the physician’s learning curve.
- Telemedicine capability - May serve as a platform for supporting tele-catheterization, carried out remotely by highly trained specialists. Our research collaboration with Corewell Health[™] has demonstrated the feasibility of using the LIBERTY[®] Endovascular Robotic System between separate and remote facilities in a coronary simulation model. The project assesses the feasibility of using LIBERTY[®] to perform simulated cardiovascular interventional procedures across two sites within the Corewell Health[™] system located 5 miles apart. The telesurgery feature of LIBERTY[®] is still being evaluated and is not covered under the Company’s 510(k) clearance with the FDA.

On August 13, 2024, we announced that we received ISO 13485:2016 certification for our quality management system. Receiving ISO 13485 certification indicates that a company has developed and implemented robust policies and procedures for the development and manufacture of regulated medical products. This is a certification ensuring compliance with the Quality Management System (QMS) requirements of the EU Medical Devices Regulation (MDR 2017/745) and supporting our future CE Mark approval, and ultimately allowing us to market the LIBERTY[®] Endovascular Robotic Surgical System in Europe as well as other regions who accept the CE Mark. We anticipate CE Mark approval in the second half of 2026. However, we can give no assurance that we will meet this or any other projected milestones, if ever. In addition, in view of the recent revision published by the FDA regarding the quality system management regulation and its incorporation by reference of the ISO 13485 standard, we believe it will help streamline our transition into this revised FDA regulation.

The Company entered into an agreement with Emory University, which will allow the parties to evaluate and explore the potential for a future collaboration in connection with autonomous robotics in endovascular procedures. Under the terms of the agreement, Emory University will assume the responsibility of exploring the feasibility of integrating the LIBERTY[®] Endovascular Robotic Surgical System with an imaging system to create an autonomous robotic system for endovascular procedures.

On September 8, 2025, we announced that the FDA has granted 510(k) clearance for the LIBERTY[®] Endovascular Robotic Surgical System.

NovaCross[®]

On October 6, 2022, we purchased substantially all of the assets, including intellectual property, devices, components and product related materials of Nitiloop Ltd., an Israeli limited liability company. The assets include intellectual property and technology in the field of intraluminal revascularization devices with anchoring mechanism and integrated microcatheter, and the products or potential products incorporating the technology owned by Nitiloop and designated by Nitiloop as “NovaCross,” “NovaCross Xtreme” and “NovaCross BTK,” and any enhancements, modifications and improvements.

RISK FACTORS

Investing in our securities involves risks. Before deciding whether to purchase our securities, you should carefully consider the risk factors incorporated by reference from our Annual Report on Form 10-K for the year ended December 31, 2024 filed with the SEC on March 25, 2025, under the heading “Item 1A. In light of these assumptions, risks, and uncertainties, the results and events discussed in the forward-looking statements contained in this prospectus or in any document incorporated herein by reference might not occur. Investors are cautioned not to place undue reliance on the forward-looking statements, which speak only as of the date of this prospectus or the date of the document incorporated by reference in this prospectus. - (1) Represents options to purchase shares of our common stock. Mitchell P. Kopin ("Mr. Kopin") and Daniel B. Asher ("Mr. Asher"), each of whom are managers of Intracoastal Capital LLC ("Intracoastal"), have shared voting control and investment discretion over the securities reported herein that are held by Intracoastal. As a result, each of Mr. Kopin and Mr. Asher may be deemed to have beneficial ownership (as determined under Section 13(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")) of the securities reported herein that are held by Intracoastal. The options are subject to a beneficial ownership limitation of 9.99%, which such limitation restricts the selling stockholder from exercising that portion of the options that would result in the selling stockholder and its affiliates owning, after exercise, a number of shares of common stock in excess of the beneficial ownership limitation. The principal business office of Intracoastal is 245 Palm Trail, Delray Beach, FL 33483.

Material Relationships with the Selling Stockholders

Other than in connection with the transactions described above and elsewhere in this prospectus, we have not had any material relationships with the selling stockholders in the last three years.

PLAN OF DISTRIBUTION

The selling stockholders, which, as used herein, includes donees, pledgees, transferees or other successors-in-interest selling shares of common stock or interests in shares of common stock received after the date of this prospectus from a selling stockholder as a gift, pledge, partnership distribution or other transfer, may, from time to time, sell, transfer or otherwise dispose of any or all of their shares of common stock or interests in shares of common stock on any stock exchange, market or trading facility on which the shares are traded or in private transactions. These dispositions may be at fixed prices, at prevailing market prices at the time of sale, at prices related to the prevailing market price, at varying prices determined at the time of sale, or at negotiated prices.

The selling stockholders may use any one or more of the following methods when disposing of shares or interests therein:

- ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;
- block trades in which the broker-dealer will attempt to sell the shares as agent, but may position and resell a portion of the block as principal to facilitate the transaction;
- purchases by a broker-dealer as principal and resale by the broker-dealer for its account;
- an exchange distribution in accordance with the rules of the applicable exchange;
- privately negotiated transactions;
- short sales effected after the date the registration statement of which this prospectus is a part is declared effective by the SEC;
- through the writing or settlement of options or other hedging transactions, whether through an options exchange or otherwise;
- broker-dealers may agree with the selling stockholders to sell a specified number of such shares at a stipulated price per share;
- a combination of any such methods of sale; and
- any other method permitted by applicable law.

The selling stockholders may, from time to time, pledge or grant a security interest in some or all of the shares of common stock owned by them. If the selling stockholders default in the performance of their secured obligations, the pledgees or secured parties may offer and sell the shares of common stock, from time to time, under this prospectus, or under an amendment to this prospectus, under Rule 424(b)(3) or other applicable provision of the Securities Act amending the list of selling stockholders to include the pledgee, transferee, or other successors-in-interest as selling stockholders under this prospectus. The selling stockholders also may transfer the shares of common stock in other circumstances, in which case the transferees, pledgees, or other successors-in-interest will be the selling beneficial owners for purposes of this prospectus.

In connection with the sale of our common stock or interests therein, the selling stockholders may enter into hedging transactions with broker-dealers or other financial institutions, which may in turn engage in short sales of the common stock in the course of hedging the positions they assume. The selling stockholders may also sell shares of our common stock short and deliver these securities to close out their short positions, or loan or pledge the common stock to broker-dealers that in turn may sell these securities. The selling stockholders may also enter into option or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities which require the delivery to such broker-dealer or other financial institution of shares offered by this prospectus, which shares such broker-dealer or other financial institution may resell pursuant to this prospectus (as supplemented or amended to reflect such transaction).

The aggregate proceeds to the selling stockholders from the sale of the common stock offered by them will be the purchase price of the common stock less discounts or commissions, if any. Each of the selling stockholders reserves the right to accept and, together with their agents from time to time, to reject, in whole or in part, any proposed purchase of common stock to be made directly or through agents. We will not receive any of the proceeds from this offering. Upon any exercise of the warrants by payment of cash, however, we will receive the exercise price of the warrants.

The selling stockholders also may resell all or a portion of the shares in open market transactions in reliance upon Rule 144 under the Securities Act, provided that they meet the criteria and conform to the requirements of that rule.

The selling stockholders and any underwriters, broker-dealers, or agents that participate in the sale of the common stock or interests therein may be “underwriters” within the meaning of Section 2(11) of the Securities Act. Any discounts, commissions, concessions, or profit they earn on any resale of the shares may be underwriting discounts and commissions under the Securities Act. Selling stockholders who are “underwriters” within the meaning of Section 2(11) of the Securities Act will be subject to the prospectus delivery requirements of the Securities Act.

To the extent required, the shares of our common stock to be sold, the names of the selling stockholders, the respective purchase prices and public offering prices, the names of any agents, dealers or underwriters, and any applicable commissions or discounts with respect to a particular offer will be set forth in an accompanying prospectus supplement or, if appropriate, a post-effective amendment to the registration statement of which this prospectus is a part.

In order to comply with the securities laws of some states, if applicable, the common stock may be sold in these jurisdictions only through registered or licensed brokers or dealers. In addition, in some states the common stock may not be sold unless it has been registered or qualified for sale or an exemption from registration or qualification requirements is available and is complied with.

We have advised the selling stockholders that the anti-manipulation rules of Regulation M under the Exchange Act may apply to sales of shares in the market and to the activities of the selling stockholders and their affiliates. In addition, to the extent applicable we will make copies of this prospectus (as it may be supplemented or amended from time to time) available to the selling stockholders for the purpose of satisfying the prospectus delivery requirements of the Securities Act. The selling stockholders may indemnify any broker-dealer that participates in transactions involving the sale of the shares against certain liabilities, including liabilities arising under the Securities Act.

We will pay all expenses of the registration of the shares of common stock, including, without limitation, SEC filing fees and expenses of compliance with state securities or “blue sky” laws; provided, however, that each selling stockholder will pay all underwriting discounts and selling commissions, if any, and any related legal expenses incurred by it. We will indemnify the selling stockholders against certain liabilities, including some liabilities under the Securities Act, arising in connection with the registration statement of which this prospectus is a part.

Certain Provisions of Delaware Law and of the Company’s Certificate of Incorporation and Bylaws

Anti-Takeover Provisions

Delaware Law

We are subject to the anti-takeover provisions of Section 203 of the Delaware General Corporation Law or “DGCL.” Section 203 prohibits a publicly-held Delaware corporation from engaging in a “business combination” with an “interested stockholder” for a period of three years after the date of the transaction in which the person became an interested stockholder, unless the business combination is, or the transaction in which the person became an interested stockholder was, approved in a prescribed manner or another prescribed exception applies. For purposes of Section 203, a “business combination” is defined broadly to include a merger, asset sale, or other transaction resulting in a financial benefit to the interested stockholder, and, subject to certain exceptions, an “interested stockholder” is a person who, together with his or her affiliates and associates, owns, or within three years prior, did own, 15% or more of the corporation’s voting stock.

Staggered Board

Our restated Certificate of Incorporation and restated bylaws provide for the Board of Directors to be divided into three classes serving staggered terms. At each annual meeting of stockholders, directors elected to succeed those directors whose terms expire are elected for a three-year term of office. All directors elected to our classified Board of Directors will serve until the election and qualification of their respective successors or their earlier resignation or removal. The Board of Directors is authorized to create new directorships and to fill such positions so created and is permitted to specify the class to which any such new position is assigned. The person filling such position would serve for the term applicable to that class. The Board of Directors (or its remaining members, even if less than a quorum) is also empowered to fill vacancies on the Board of Directors occurring for any reason for the remainder of the term of the class of directors in which the vacancy occurred. Members of the Board of Directors may only be removed for cause and only by the affirmative vote of 80% of the outstanding voting stock. These provisions are likely to increase the time required for stockholders to change the composition of the Board of Directors. For example, in general, at least two annual meetings will be necessary for stockholders to effect a change in a majority of the members of the Board of Directors. The provision for a classified board could prevent a party who acquires control of a majority of our outstanding common stock from obtaining control of our Board of Directors until our second annual stockholders meeting following the date the acquirer obtains the controlling stock interest. The classified board provision could have the effect of discouraging a potential acquirer from making a tender offer or otherwise attempting to obtain control of us and could increase the likelihood that incumbent directors will retain their positions.

Advance notice provisions for stockholder proposals

Our restated bylaws establish an advance notice procedure for stockholder nominations of candidates for election to our Board of Directors, as well as procedures for including proposed nominations at special meetings at which directors are to be elected. Stockholders at our annual meeting may only consider proposals or nominations specified in the notice of meeting or brought before the meeting by or at the direction of our board or by a stockholder who was a stockholder of record on the record date for the meeting, who is entitled to vote at the meeting and who has given to our secretary timely written notice, in proper form, of the stockholder's intention to bring that business before the meeting, and who has complied with the procedures and requirements set forth in the bylaws. Although the bylaws do not give the Board of Directors the power to approve or disapprove stockholder nominations of candidates or proposals regarding other business to be conducted at a special or annual meeting, these bylaws may have the effect of precluding the conduct of some business at a meeting if the proper procedures are not followed or may discourage or defer a potential acquirer from conducting a solicitation of proxies to elect its own slate of directors or otherwise attempting to obtain control of Microbot.

Special meetings of stockholders

Special meetings of the stockholders may be called only by the Board of Directors, president, or secretary upon the application of a majority of the directors. Stockholders are not permitted to call a special meeting or to require our Board of Directors to call a special meeting.

No stockholder action by written consent

Our restated Certificate of Incorporation and restated bylaws do not permit our stockholders to act by written consent. As a result, any action to be effected by our stockholders must be effected at a duly called annual or special meeting of the stockholders.

Super-majority stockholder vote required for certain actions.

The DGCL provides generally that the affirmative vote of a majority of the shares entitled to vote on any matter is required to amend a corporation's Certificate of Incorporation or bylaws, unless the corporation's Certificate of Incorporation or bylaws, as the case may be, requires a greater percentage. Our restated Certificate of Incorporation requires the affirmative vote of the holders of at least 80% of our outstanding voting stock to amend or repeal certain provisions of our restated certificate of incorporation. This 80% stockholder vote would be in addition to any separate class vote that might in the future be required pursuant to the terms of any preferred stock that might then be outstanding. In addition, an 80% vote is also required for any amendment to, or repeal of, our restated bylaws by the stockholders. Our restated bylaws may be amended or repealed by a vote of a majority of the total number of authorized directors.

Limitation of Liability and Indemnification

Our restated Certificate of Incorporation and our amended and restated bylaws provide that each person who was or is made a party to, or is threatened to be made a party to, or is otherwise involved (including, without limitation, as a witness) in any action, suit, or proceeding, whether civil, criminal, administrative, or investigative, by reason of the fact that he or she is or was one of our directors or officers or is or was serving at our request as a director, officer, or trustee of another corporation, or of a partnership, joint venture, trust or other enterprise, including service with respect to an employee benefit plan, whether the basis of such proceeding is alleged action in an official capacity as a director, officer, or trustee, or in any other capacity while serving as a director, officer, or trustee, shall be indemnified and held harmless by us to the fullest extent authorized by the DGCL against all expense, liability, and loss (including attorneys' fees, judgments, fines, ERISA excise taxes, or penalties and amounts paid in settlement) reasonably incurred or suffered by such.

Section 145 of the DGCL permits a corporation to indemnify any director or officer of the corporation against expenses (including attorneys' fees), judgments, fines, and amounts paid in settlement actually and reasonably incurred in connection with any action, suit, or proceeding brought by reason of the fact that such person is or was a director or officer of the corporation, if such person acted in good faith and in a manner that he or she reasonably believed to be in, or not opposed to, the best interests of the corporation, and, with respect to any criminal action or proceeding, if he or she had no reasonable cause to believe his or her conduct was unlawful. In a derivative action (i.e., one brought by or on behalf of the corporation), indemnification may be provided only for expenses actually and reasonably incurred by any director or officer in connection with the defense or settlement of such an action or suit if such person acted in good faith and in a manner that he or she reasonably believed to be in, or not opposed to, the best interests of the corporation, except that no indemnification shall be provided if such person shall have been adjudged to be liable to the corporation, unless, and only to the extent that, the Delaware Chancery Court or the court in which the action or suit was brought shall determine that such person is fairly and reasonably entitled to indemnity for such expenses despite such adjudication of liability.

Pursuant to Section 102(b)(7) of the DGCL, Article Nine of our restated Certificate of Incorporation eliminates the liability of a director to us or our stockholders for monetary damages for such a breach of fiduciary duty as a director, except for liabilities arising:

- from any breach of the director's duty of loyalty to us or our stockholders;
- from acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law;
- under Section 174 of the DGCL; and
- from any transaction from which the director derived an improper personal benefit.

We have entered into indemnification agreements with our directors and certain officers, in addition to the indemnification provided in our restated certificate of incorporation and our amended and restated bylaws, and intend to enter into indemnification agreements with any new directors and executive officers in the future. We have purchased and intend to maintain insurance on behalf of any person who is or was a director or officer against any loss arising from any claim asserted against him or her and incurred by him or her in any such capacity, subject to certain exclusions.

The foregoing discussion of our restated Certificate of Incorporation, amended and restated bylaws, indemnification agreements, indemnity agreement, and Delaware law is not intended to be exhaustive and is qualified in its entirety by such restated certificate of incorporation, amended and restated bylaws, indemnification agreements, indemnity agreement, or law.
